Subject: FW: FW: Nexus Ventures Annual Forum - need quote by Thursday!!

Team - see the chain below from the client. He called me again this morning, few updates on top of what's written down there:

- Event is now confirmed for the King Abdullah Financial District conference centre, Riyadh. One day event, but setup night before.
- He said “make the main screen bigger, at least 8 meters wide, it needs to wow people when they walk in”. The height he didn't say. Earlier email says 6x3 so I guess keep the same ratio?? use your judgment
- FORGET the second stage in the breakout room. Cancelled. They're doing a panel setup instead - he wants a “nice lounge feel” for 5 speakers, sofas etc, plus sound obviously so people can hear them. Maybe 2 of those sofa sets? and mics.
- Budget expectation he mentioned on the phone: “around 250 to 300k”. Don't design to the max of that, we want to leave room.
- For the hologram box: procurement told Fahad we quoted them something similar back in 2024 for around SAR 14,000, so just use that as the basis.

Please get a proper costed quote together. Finance wants to see it with our margins broken out per line, not just one number at the bottom.

Khalid

Subject: RE: Annual Forum production

Khalid, salam,

Following our meeting, here is what we are thinking for the forum. Around 400 guests attending, maybe 450 if the CEO invites the extra delegation, lets plan for the bigger number to be safe.

Main hall:

- A stage, something like 12 meters, with steps and it must have the ramp for accessibility, our chairman uses a wheelchair
- Big LED screen behind the stage, we were thinking 6m by 3m, good quality but doesn't need to be the super premium one, normal indoor quality is fine
- Proper sound for the room and lighting, we want it to feel like a “show” when the CEO walks out, moving lights etc. Someone to operate all of this on the day obviously
- Round tables for dinner seating for everyone, 10 per table
- Registration area at the entrance with a branded desk and a backdrop for photos, maybe 6 meters wide, 2.5m high, with our new logo

Breakout room:

- Small second stage, nothing fancy (SEE KHALID'S NOTE ABOVE - CANCELLED)
- Projector and screen is fine here, no need for LED
- Cocktail style, high tables, for around 80 people

Also:

- We saw at another event a floor sticker thing at the entrance, like the logo printed on the floor when you walk in? We want that, maybe 3m x 3m
- 8 or 10 uplighters around the hall in our brand colors (gold)
- One of those hologram boxes that shows the product spinning in 3D - my marketing team is obsessed with this, please include it
- Whatever crew/technicians you need, include them, we don't want surprises on the invoice later

The venue has power but last year at the other hotel the power cut during the CEO speech (disaster!!) so we want backup power for the main hall AV, non negotiable.

Timeline: quote this week please, event is in 6 weeks.

Shukran,

Fahad
